Packing Support Plates (Hump Type)

Also called: Hump-shaped support plate · Gas injection support plate

Supports random packing while giving the gas a large area to pass through.

What is it? A strong plate with hump-shaped beams at the bottom of a bed of random packing. It carries the packing and leaves plenty of open space for the gas.

Key Features

- Large gas passage area
- Openings not easily blocked

Applications

- Packed columns with random packing
