Pipe Liquid Distributors

Also called: Pipe distributor · Ladder distributor

A pipe distributor with a large open area for gas, for medium or lower liquid loads.

What is it? A network of pipes with small holes, placed above the packing, that spreads the liquid evenly over it.

Key Features

- Free area for gas above 70%
- Operating flexibility 2:1 to 2.5:1
- Double-row type for higher flexibility
- For large, medium and small towers

Applications

- Packed towers with medium or low liquid loads
