Chevron Mist Eliminators (Vane Type)

Also called: Vane mist eliminator · Vane pack demister · Scrubber mist eliminator

Removes droplets carried with the gas at the top of a tower, reducing product loss and protecting the compressor.

What is it? A pack of zigzag-shaped plates. The gas has to turn as it flows between them; the liquid drops cannot follow the turns, so they hit the plates and drain away.

Key Features

- PP and metal types
- Plate profiles: C-type, S-type and customised hemming type
- Six designs for different installations

Applications

- Towers (installed at the top)
- Flue gas
- Gas scrubbers and knock-out drums
- Horizontal gas flow in ducts

Materials

- Polypropylene (PP)
- Metal
